

NEUTRA SOLV

NEUTRA SOLV is a proprietary blended solvent that offers a solution to the environmental and EPA issues facing those companies that must use solvents. This solvent has proven effective as a replacement for naphtha, mineral spirits and other petroleum based solvents.

NEUTRA SOLV removes heavy oils and greases, tars, adhesives and inks. This solvent has a KB value (which measures solvency) 65% greater than mineral spirits. More importantly, **NEUTRA SOLV** is non-toxic and is 95% degraded in soil in 28 days. Users will also be pleased to find this solvent is low VOC and generates ultra low evaporative emissions.

NEUTRA SOLV is an excellent alternative to traditional solvents. It offers employees a safe, environmentally friendly solvent that is very effective.

NEUTRA SOLV is a 100% naturally occurring solvent. It contains no surfactants, alcohols, or water. Because it is naturally occurring and biodegradable, it eliminates most environmental impact problems.

PHYSICAL PROPERTIES :

COLOR	Clear/straw
ODOR	Misty orange
APPLICATION METHOD	Spray, brush, mop rag
FLASH POINT	Above 300 F
pH	NA
KAURI BUTANOL VALUE	58
SNAP	EPA listed as approved replacement chemical for solvent usage
HAPS	Not listed
SARA	Title 313-not reportable
VOC	Low VOC, less than 10%

APPLICATION NOTES:

NEUTRA SOLV should be applied directly to the surface to be cleaned and degreased. This solvent can be used at any temperature where you would use water.

Allow **NEUTRA SOLV** to penetrate 3 to 5 minutes. Provide agitation as needed for heavy deposits. When possible, follow with a high pressure wash and rinse.

After use, rinse thoroughly with water and then remove all traces of contaminants with a biodegradable cleaner such as **NEUTRA CLEAN**.

ADVANTAGES:

- Higher flash point than petroleum distillates or d-limonene.
- Evaporates slower than water, allowing for less waste.
- Low VOC-environmentally friendly and safe for workers.
- Biodegradable.

Dispose of contaminated solvent in accordance with local regulations.
